

YOUR HOME IN AN APP

We are now offering you the chance to manage all Comelit security systems directly from a single app, to give you full control of your home with the greatest of ease, wherever you may be.

THE ONLY SINGLE APP

Offering the user a single App for remote control of the entire home was one of the main objectives in creating solutions capable of bringing technology closer to people and making all the services connected to it more accessible. With this in mind, we developed an interface which allows the user to access and easily control all Comelit systems installed, directly from their smartphone. Comelit App is a smart, touch-friendly solution that is constantly evolving to keep up with the world of the Internet of Things.

VIDEO ENTRY

Design, technology and security.
Even when you are away from home.

HOME AUTOMATION

The smart home you can manage
wherever and however you like.

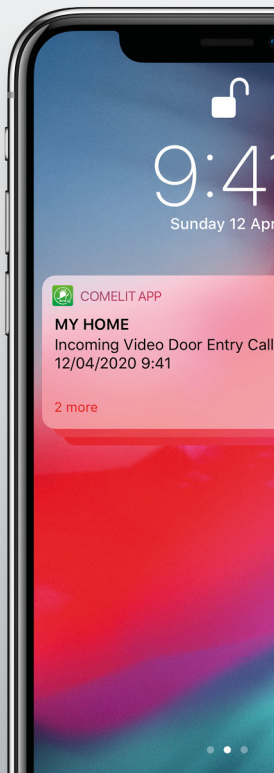

ANTI-INTRUSION

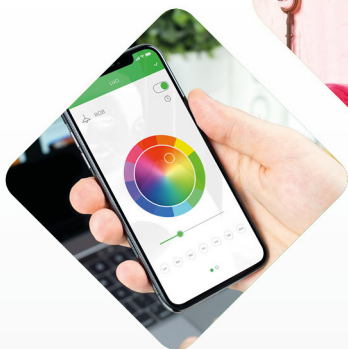

A variety of exclusive solutions
suitable for all requirements.
Even from afar.

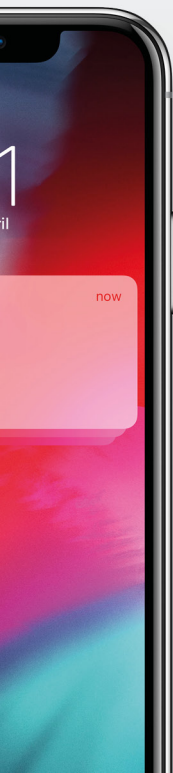

VIDEO SURVEILLANCE

With analogue and digital technology.
For richly detailed images.

Manage all your Comelit systems with a few simple taps: schedule events, check cameras and answer calls! Do all of this even when you are not at home; with the Comelit app you will no longer have to remember if you switched off the lights or set the alarm.

The building I live in has just switched to this system and this app, and it works extremely well. It also calls my landline if there is no answer on my mobile.

App Store user **Juijubeans**

*Translated review

Really good app. Reliable and can view multiple sites easily.

Play Store user **Mike Campbell**

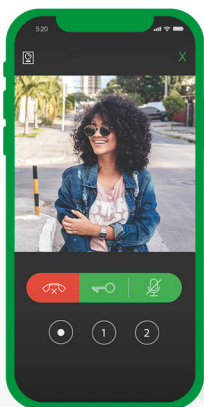

*Translated review

I can finally control home automation and access with the same app. Keep up the good work, developers!

VIDEO ENTRY

- Call answering from external units
- Playback of messages recorded by visitors
- Calls to connected door entry monitors
- Gate and door opening
- Entry light activation
- External unit self activation

HOME AUTOMATION

- Scenario creation and activation
- Climate control (Temperature, Humidity, Timer)
- Light control (ON-OFF, RGB, Dimmer, Dali)
- Consumption and energy costs monitoring
- Irrigation management
- Roller blind and Venetian blind control
- Schedule configuration
- Logic rule enabling
- Integration with voice assistants

Widgets on the homepage

You can select your favourite services, or those you use most often, from the Widgets menu so that you can find them directly on the homepage.

Push notifications

You can opt to receive all push notifications so that everything is under control, even when the app is not open. This is particularly useful for video entry phone calls and alarms!

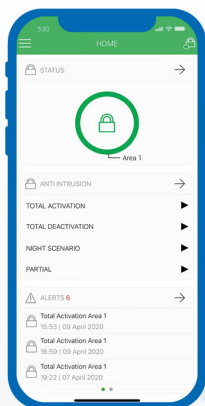

Combine several systems

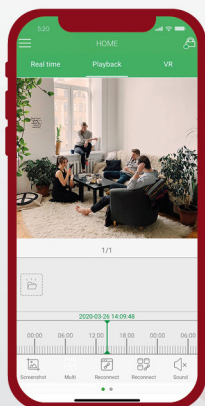

You can activate or automate the triggering of several actions from different families when an event occurs. Such as the “going out” scenario, which switches off lights, lowers the roller blinds and sets the alarm.

ANTI-INTRUSION

- Instant recording on the app (with temporary code)
- Supports Vedo and Secur Hub control panels
- Alarm video verification
- Full system management
- Live camera streaming
- Individual area status display
- Consultation of control panel event log
- Activation of medical, fire and other alarms...

VIDEO SURVEILLANCE

- Connection via P2P/ComelitDNS
- Live streaming on full screen
- Multi-screen viewing
- Playback search and replay
- Manual REC
- PTZ control
- Snapshots saved in the internal memory

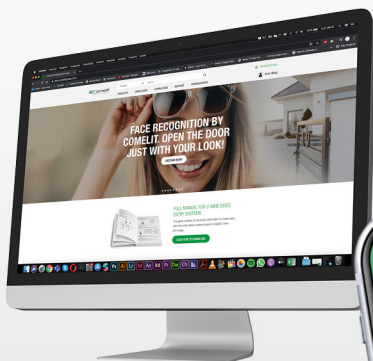

Comelit technical assistance for planning advice and on-site support.

Professionals can always count on the valuable support offered by the Comelit technical assistance service: a fast response to queries and requests for information, on-site assistance and design advice.
